

1. Maybe will need to play with css a little to improve some parts when live building theme (example maybe footer goto top will be better on right, need to play when building css)
2. Icons used are Font Awesome Library
3. Please use all functionality from design for car rentals / booking, please do not miss anything (forms, online booking, switching from grid / list view in archive, calculator in widget and others)

Free plugins used in this theme can be used in Speedy:

<https://themeforest.net/item/motors-automotive-cars-vehicle-boat-dealership-classifieds-wordpress-theme/13987211>

4. In this theme it will be better to add option to use multiple footers with different widgets and color schemes. It will make this theme look super.
5. I sliced background images without outlined background text, because let's create it with css:

6. Don't forget list/grid view for cars:
